APPROVAL OF STATE ENGINEER

This is to certify that I have... This permit is issued subject to all prior rights on the source. The amount of water herein granted is placed at 1.0 cubic foot per second for the full acreage applied for, notwithstanding the fact that this land has already been granted a water right from a Drilled Well and Mesquite Springs under permits Nos. 5760 and 5761 respectively, so that such amount of water may be diverted and used in the event there is a shortage of water in the sources described in permits Nos. 5760 and 5761. However, the total amount of water granted from the combined sources named in the three permits shall not exceed the statutory allowance of 1.6 cubic feet of water per second for the 160 acres proposed to be irrigated under the permits. The applicant will be required, at the time of filing proof of beneficial use of water, to definitely segregate the areas of land which obtain water from each of the sources described in the three permits, so that certificates can be issued for the land to which the water of each source is appurtenant. A substantial headgate and weir must be installed at or near the point of diversion to facilitate the measurement and control of water. The State reserves the right to regulate the use of the water herein granted at any and all times.

Work must be prosecuted with reasonable diligence and be completed on or before June 19, 1921.

Proof of completion of work shall be filed before July 19, 1921.

Application of water to beneficial use shall be made on or before November 19, 1924.

Proof of the application of water to beneficial use must be filed with State Engineer on or before December 19, 1924.

Proof of labor filed JUL 19 1920 WITNESS MY HAND AND SEAL this 19th day of March, 1920.

Cancelled MAR 5 1941 because of failure of applicant to comply with the provisions of permit
